

LIBERTY LINK®
IGNITE® HERBICIDE TOLERANT

3.5 RM

Agronomics

- Big dog yields
- Very good overall disease package
- Excellent SDS protection

PRR Tolerance/
Resistance

Rps1k

Plant Traits

Plant Height	Medium
Plant Type	Full Bush
Cyst Nematode	MR3,MR14
Hilum Color	Black
Flower Color	Purple
Pubescence Color	Light Tawny

Disease and Resistance Ratings

Seed Piracy

Seeds containing the Roundup Ready® trait and the Genuity™ Roundup Ready 2 Yield® trait are protected under numerous United States patents, including Patent No. RE39,247. It is unlawful to save Roundup Ready® Soybeans or Genuity™ Roundup Ready 2 Yield® Soybeans for planting or transfer to others for use as a planting seed.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup Ready® crops contain genes that confer tolerance to glyphosate, the active ingredient in Roundup® brand agricultural herbicides. Roundup® brand agricultural herbicides will kill crops that are not tolerant to glyphosate. Acceleron and Design™, Genuity®, Genuity and Design®, Genuity Icons, Roundup®, Roundup Ready®, Roundup Ready 2 Technology and Design™, are trademarks of Monsanto Technology LLC. Ignite® and LibertyLink® and the Water Droplet Design® are registered trademarks of Bayer. All other trademarks are the property of their respective owners. ©2010 Monsanto Company.

Benefits of New Seed

Economics of New Seed vs. Bin-Run

- Bin-run planting rates are generally 15% higher than new certified seed
- Average loss of approximately 10-15% cleanout at harvest for bin-run seed

Convenience

- High quality and high yield potential product vs. bin-run
- Reliable seed supply in many maturities

Limited Warranty Benefits

- Dealer agronomic support before and after the sale
- Risk management benefits of Roundup Rewards® (over \$600 million paid in benefits)

New Innovations

- Monsanto's 100% commitment to agriculture
- Our very preliminary estimate is that farmers get a \$6 benefit for each \$1 spent on private sector research.
