

3.6 RM

## Agronomics

- Terrific disease package
- Consistent yields on any soil type
- Strong emergence with Rps1c gene for PRR

PRR Tolerance/  
Resistance

**Rps1c**

## Plant Traits

Plant Height	Medium
Plant Type	Medium Bush
Cyst Nematode	R3,MR14
Hilum Color	Black
Flower Color	Purple
Pubescence Color	Light Tawny

## Disease and Resistance Ratings

## Benefits of New Seed

### Economics of New Seed vs. Bin-Run

- Bin-run planting rates are generally 15% higher than new certified seed
- Average loss of approximately 10-15% cleanout at harvest for bin-run seed

### Convenience

- High quality and high yield potential product vs. bin-run
- Reliable seed supply in many maturities

### Limited Warranty Benefits

- Dealer agronomic support before and after the sale
- Risk management benefits of Roundup Rewards® (over \$600 million paid in benefits)

### New Innovations

- Monsanto's 100% commitment to agriculture
- Our very preliminary estimate is that farmers get a \$6 benefit for each \$1 spent on private sector research.

### Seed Piracy

Seeds containing the Roundup Ready® trait and the Genuity™ Roundup Ready 2 Yield® trait are protected under numerous United States patents, including Patent No. RE39,247. It is unlawful to save Roundup Ready® Soybeans or Genuity™ Roundup Ready 2 Yield® Soybeans for planting or transfer to others for use as a planting seed.

**ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS.** Roundup Ready® crops contain genes that confer tolerance to glyphosate, the active ingredient in Roundup® brand agricultural herbicides. Roundup® brand agricultural herbicides will kill crops that are not tolerant to glyphosate.
