

4.1 RM

## Agronomics

PRR Tolerance/  
Resistance

**Rps1c**

- Outstanding performance on medium to lighter soils
- Solid SDS score and PRR tolerance
- Good standability and shatter resistance

## Plant Traits

|                  |             |
|------------------|-------------|
| Plant Height     | Medium-Tall |
| Plant Type       | Medium Bush |
| Cyst Nematode    | R3,MR14     |
| Hilum Color      | Buff        |
| Flower Color     | White       |
| Pubescence Color | Gray        |

## Disease and Resistance Ratings

### Seed Piracy

Seeds containing the Roundup Ready® trait and the Genuity™ Roundup Ready 2 Yield® trait are protected under numerous United States patents, including Patent No. RE39,247. It is unlawful to save Roundup Ready® Soybeans or Genuity™ Roundup Ready 2 Yield® Soybeans for planting or transfer to others for use as a planting seed.

## Benefits of New Seed

### Economics of New Seed vs. Bin-Run

- Bin-run planting rates are generally 15% higher than new certified seed
- Average loss of approximately 10-15% cleanout at harvest for bin-run seed

### Convenience

- High quality and high yield potential product vs. bin-run
- Reliable seed supply in many maturities

### Limited Warranty Benefits

- Dealer agronomic support before and after the sale
- Risk management benefits of Roundup Rewards® (over \$600 million paid in benefits)

### New Innovations

- Monsanto's 100% commitment to agriculture
- Our very preliminary estimate is that farmers get a \$6 benefit for each \$1 spent on private sector research.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup Ready® crops contain genes that confer tolerance to glyphosate, the active ingredient in Roundup® brand agricultural herbicides. Roundup® brand agricultural herbicides will kill crops that are not tolerant to glyphosate.
