

2.9 RM

Agronomics

PRR Tolerance/
Resistance

Rps1c

- Outstanding emergence and early vigor
- Solid overall disease package
- Ideal for better soils with low SCN pressure

Plant Traits

Plant Height	Medium
Plant Type	Medium Bush
Cyst Nematode	Susceptible
Hilum Color	Black
Flower Color	Purple
Pubescence Color	Tawny

Disease and Resistance Ratings

Benefits of New Seed

Economics of New Seed vs. Bin-Run

- Bin-run planting rates are generally 15% higher than new certified seed
- Average loss of approximately 10-15% cleanout at harvest for bin-run seed

Convenience

- High quality and high yield potential product vs. bin-run
- Reliable seed supply in many maturities

Limited Warranty Benefits

- Dealer agronomic support before and after the sale
- Risk management benefits of Roundup Rewards® (over \$600 million paid in benefits)

New Innovations

- Monsanto's 100% commitment to agriculture
- Our very preliminary estimate is that farmers get a \$6 benefit for each \$1 spent on private sector research.
